

## Roller Furling Genoa

The Roller Furling Genoa is designed for use on any furling system. Its design incorporates all the lessons learned from long distance cruising and racing, and takes into account the quality standards and durability requirements of the cruising yachtsman.

### Innovation - Optimum Shape Maintenance

The Roller Furling Genoa features a unique innovation that we call our 'Multi Track Foam'.

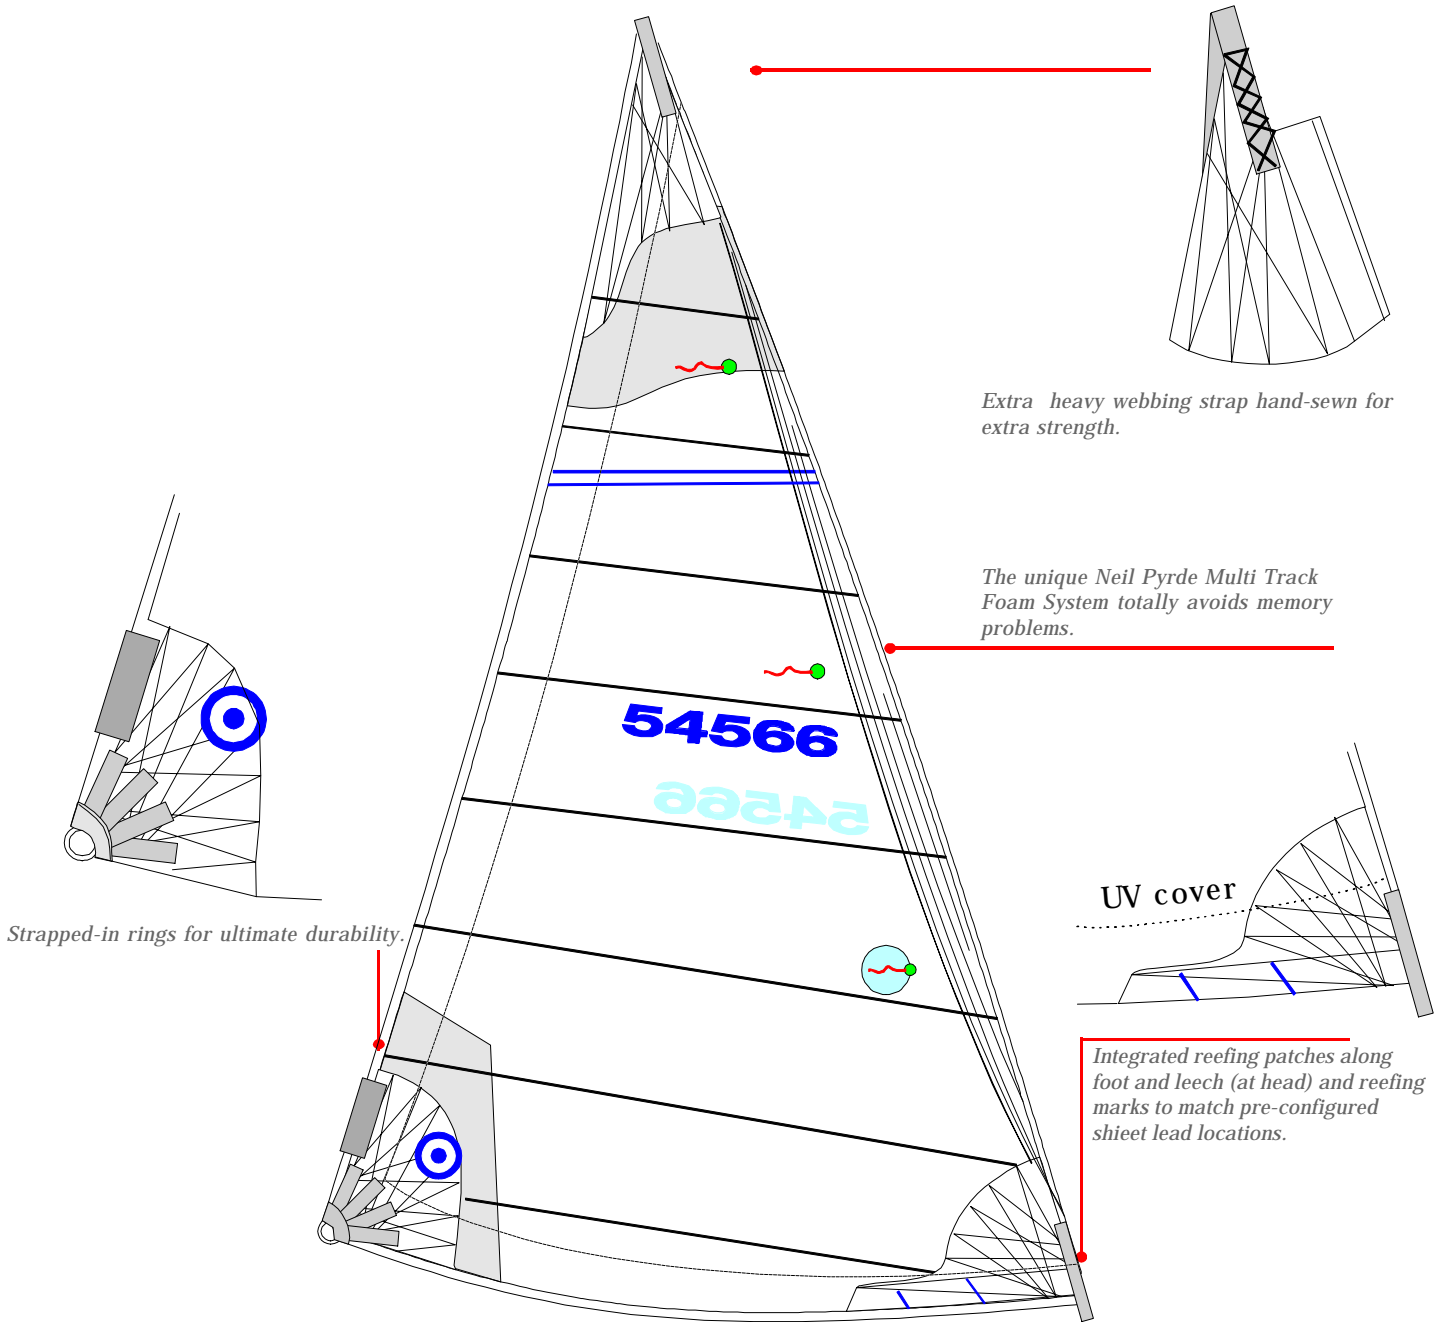

On most foam luff headsail systems, the foam pad can be permanently distorted after it has been rolled up for any period of time. Our Multi Track Foam Luff System is made up of individual 1-inch foam strips and provides total furling flexibility without ever distorting the foam or sail shape.

The Multi Track Foam Luff System offers another unique advantage. In order to give the correct shape to the sail, genoas are cut with more draft in the mid section. As the sail is rolled up, more cloth has to be taken out of this mid section than elsewhere on the sail. The elliptical shape of the Multi Track Foam pads is cut to exactly fit the draft profile of the Genoa, thereby maintaining correct sail shape

more precisely than any other luff furling system. Optimum shape maintenance means you lose little in performance when you reef your sail.

*The Multi Track Foam system is smooth in use and allows the sail to furl with a correct shape when the breeze comes up.*

## Quality, Service, Value

Every sail we build comes with the assurance of a two year warranty of quality, service and value. Our consultants are trained to listen to your requirements; advice and information are only a phone call away.

If you ever need service, our consultant will direct you to the nearest of our worldwide

network of Service lofts. No matter where in the world your sailing takes you, we are there to help.

For further information, contact your nearest Neil Pryde consultant.

Photos and type may describe features not applicable to all sizes of sails. Our ongoing development program may change features and specifications without notice.
